

## Access to University of South Australia Library Databases

Most University of South Australia databases and eJournals can be accessed via the Library's authentication system using a UniSA network account. By this process you are recognised as a student or staff member of the University of South Australia and granted access to our databases

**Students:** must have a current enrolment with the University of South Australia. If you require access to databases due to program incompleteness please consult the information detailed on the Database Access Information page

**Staff:** must have a current HR record and University Network account. If you do not have a network account please consult the information details on the Database Access Information page

Database Access Information page:

<http://www.library.unisa.edu.au/resources/database/dbaccess.asp>

### Access to Databases

At the databases webpage [www.library.unisa.edu.au/resources/database](http://www.library.unisa.edu.au/resources/database) choose a database from either the:

- a) database title or
- b) database subjects

The screenshot shows the UniSA Library website interface. At the top, there is a navigation bar with the UniSA logo and the text 'UniSA Library'. Below this, there are several tabs: 'About the library', 'Services', 'Resources', 'Research', and 'Information Skills'. The 'Resources' tab is selected, and the 'Databases' section is displayed. The 'Databases' section includes a heading 'Databases' and a sub-heading 'Please read EResources News for updates regarding access to resources'. Below this, there is a paragraph explaining that databases provide access to journal literature. A list of database categories is shown, including 'database titles - ABCDEFGHIJKLMNOPQRSTUVWXYZ', 'database subjects - ABCDEFGHIJKLMNOPQRSTUVWXYZ', 'database access information', 'eResource passwords (UniSA staff and students)', 'database guides', 'database trials', 'strategies for searching', 'Citation FindIt', 'FindIt', and 'Managing references'. A yellow box with the text '1. Click on either database titles or database subjects' is positioned to the left of the list, with two arrows pointing to the 'database titles' and 'database subjects' links.

About the library Services Resources Research Information Skills

< back

**ScienceDirect**

**Access**  
Science Direct for UniSA staff and students.

**Access Information**  
Access within the University computer network (e.g. using a computer on a UniSA campus or connected to the UniSA network) is available to staff and students by direct logon. Access outside the University computer network (e.g. using a computer from home or elsewhere besides a UniSA campus) UniSA Students and Staff login using UNINET User name and Password.

**Licence**  
Unlimited user licence

**System Requirements**  
System requirements: Web Browser, Adobe Acrobat Reader.

**Terms and conditions of use**  
Access to databases and full-text services subscribed to by the Library is restricted by licence to current staff and enrolled students of UniSA. You may view, print and/or download contents from these services provided such use is for your University studies, teaching or research, does not constitute sequential and systematic downloading of an unreasonable volume of licensed content or amount to or result in commercial distribution or plagiarism. Use of these resources

4. Click here to access the database

The database description page will indicate if the database is accessible outside the UniSA Network and the number of users permitted to use is at the one time

And then you will be taken to a page that looks like this:

UniSA University of South Australia Library

**Authenticate**

Welcome to UniSA

The resource you have requested is restricted

- UniSA staff and students need to enter Username (UniSA NetWork ID e.g. "blogix" or "blogix001") and Password
- International Wine Marketing Database (WineDB) subscribers need to enter the supplied Username and Password for this database

Username

Password

Login

5. Staff and students must enter their UniSA Network ID in the Username box and their UniSA password in the Password box

## The Library

[www.library.unisa.edu.au](http://www.library.unisa.edu.au)

You will either directly reach a database, as in the example below OR you will reach a list of databases and can choose the one(s) you wish to search

The Library is unable to provide assistance with UniSA Network IDs or passwords. For assistance with UniSA Network access clients must contact the University IT HelpDesk:

<http://www.unisa.edu.au/ists/ITHelpDesk/default.asp>

For assistance with selecting and using databases, please contact the Library by using the Ask a Librarian form on the Ask the Library website:

[www.library.unisa.edu.au/help](http://www.library.unisa.edu.au/help)
